

ArcticRevolution 70KLARAN & ArcticRevolution 70BKLARAN

A Revolution In Cooler Design Coupled With State Of The Art KLARAN UVC LED Water Purification System

The KLARAN UVC LED shield is situated between the direct chill tank and the dispensing tap to provide point of dispense protection from bacteria and viruses

ArcticRevolution 70 KLARAN

ArcticRevolution 70B KLARAN

ArcticRevolution Features

- Direct chill ambient & chilled water cooler
- Manual touch buttons. When chilled water is dispensed the central droplet will flash blue. When ambient water is dispensed it will flash grey.
- Sleek and compact in design of 370h, 240w and 488d, to fit small work spaces
- High dispensing area of 21cm
- Flood Guard inlet solenoid protects against large scale flooding
- High quality – built to last

How The KLARAN UVC LED Shield Works

- The KLARAN UVC LED purification system destroys bacteria and viruses through UVC LED radiation as the water passes through the KLARAN Shield on its way from the water tank to the tap
- It destroys 99.99% of Cryptosporidium, E Coli, Giardia, Pseudomonas, Legionella and other bacteria
- Research at Boston University confirms that the KLARAN Shield also kills the Covid 19 virus
- This represents a real breakthrough in water cooler hygiene by purifying the water 24/7
- Outstanding reliability. In 5+ years continuous testing the UVC LED radiation has remained constant
- An added advantage is that the KLARAN Shield, once installed, virtually requires no maintenance
- The KLARAN Shield can be factory installed into any AA First direct chill cooler, or can be purchased as an accessory for self-installation into your direct chill cooler park

refreshingly different

ArcticRevolution 70KLARAN & ArcticRevolution 70BKLARAN

A Revolution In Cooler Design Coupled With State Of The Art KLARAN UVC LED Water Purification System

Touch pad buttons to dispense water. When cold water is dispensing the central droplet will flash in blue. For ambient water it will flash in grey

An extremely high dispensing area of 21cm for easy filling of sports bottles

The KLARAN UVC LED Shield is situated between the direct chill tank and the dispensing tap to provide point of dispense protection from bacteria and viruses

Discreet internal filter placement with easy access - Simply depress the spring-loaded base of the front panel

Accessories For The ArcticRevolution

Filter housing with carbon block candle & nanofilter.

Installation rail with filter. Includes compression fitting, 1-micron green filter, Water block, copper pressure reducing valve & non-return valve.

FloodGuard - Inlet solenoid only opens to allow water into the cooler, when water is dispensed. By remaining closed all other times it protects the cooler against leaks.

The KLARAN UVC LED shield can be purchased as an accessory for self-installation into your direct chill cooler park.
