

Issue 2 The information hub is designed to provide - mainly technical - information relating to Water Coolers and Boilers, to assist you with your work

SIP[®]neo₃ SIP Automatic Sanitising

- Reduces your sanitising visits by 50%
- Can reduce Electricity Consumption by between 56% to 61% when using SIP Sleep Mode from 18.00 to 08.00 hours
- Helps the environment by avoiding the related carbon production

Is a programmable ozone generator that can be fitted to most Bottled or Plumbed In Coolers

SIP[®]neo₃ Sanitising

SIP[®]neo₃ Sanitises by circulating micro-bubbles of ozone into your Cooler's reservoir.

Each night, SIP[®]neo₃ activates as programmed to automatically sanitise the water cooler.

Bacteria, viruses, mould and algae can't survive exposure to ozone, nature's most powerful oxidizing agent.

With technology inspired by nature, you can rest assured that your water will be great to SIP

SIP[®]neo₃ Sleep Mode Electricity Savings

For less than the cost of a couple of cooler sanitisation's, your coolers can be automatically sanitised every day.

- Automatically sanitises your Bottled or POU Cooler overnight, every night 24/7
- Eliminates half your sanitisation call outs
- Ensures maximum Cooler hygiene
- By activating SIP 12-hour Sleep Mode from 18.00 to 06.00 plus Sleep Mode on weekends, your customer can make significant savings in electricity
- A Hot & Cold Cooler without Sleep Mode would use 983KWH per year. With Sleep Mode this reduces to 377KWH, a saving of 61% at 14p per KWH which would equate to a saving of £85 per year!! The saving for an Ambient and Chilled Cooler, using the same formula saves 56% amounting to £11 per year

A win win situation all round!

How does SIP[®]neo₃ work?

- Pumps tiny bubbles of ozone, which it creates from air (Oxygen), and pumps them into the water trail
- Ozone is a very strong oxidising agent which kills bacteria
- Ozonation happens for 10 mins at 3.00am every night 24/7
- Ozone has a little smell and taste and is not harmful to humans. Ozone occurs naturally during a thunderstorm when one can notice a fresh clean smell.
- SIP Neo3 protects your business by protecting the health of your customers and in the process saves you and them money!

Have a look at the SIP Video which explains the process in graphic detail-
