

THE AA WATER FILTER RANGE

A Powerful Combination of A Low-Cost **In-Line** Filter with A Range of **GREEN** Filters for use with AA and COSMETAL Water Coolers.

FILTERXL IN-LINE FILTER

**FILTER XL
(FILTXL)**

A low cost in-line carbon block filter that removes the taste and odour of chlorine from mains water. The FILTERXL is a conventional filter, complete with a Carbon Block Filter sealed inside the plastic housing.

In-Line Filter.

GREEN FILTER RANGE

**REUSABLE
FILTER HOUSING
(FILTHOU)**

**CARBON BLOCK
FILTER CANDLE
(FILTCAR)**

**NANOFILTER
CANDLE
(NANOF)**

(GREEN) Reusable Filter Housing

The **GREEN** filter housing can be re-used multiple times, reducing plastic waste. The **GREEN** Filter Candles simply pushfit onto a stem of the Filter Housing Screwtop.

(GREEN) Carbon Block Filter Candle

Removes taste and odour of chlorine from mains water. The Carbon Block Filter Candle is compatible with the **GREEN** Filter Housing, and can be recycled with household waste.

(GREEN) NanoFilter Candle

Whilst still removing the taste and odour of chlorine, the NanoFilter also removes 99.9% of Cryptosporidium, E Coli, Giardia & Pseudomonas. In addition, its woven structure guarantees an optimum flow rate even at low water pressures and resists blocking with peaty water. Compatible with the reusable **GREEN** Filter Housing and can be recycled with household waste.

GET THE MOST OUT OF OUR FILTERS...

- All Filters should be replaced regularly.
- Replacing a **GREEN** Filter only requires replacing the Filter Candle.
- Using the **GREEN** Filter Housing just 6 times brings the cost of a **GREEN** Filter Housing plus a **GREEN** Carbon Block Candle close to the cost of our **FILTER XL**.
- Ordering our Filters together with our equipment will in most cases save you on Freight Costs.
- Use an empty **GREEN** Filter Housing for sanitising by filling it with Sanitising solution to flush into the Coolers water trail.
- AA Filters are in stock for next day delivery.
