**Save money.
Improve service.
Reduce CO₂ impact.**

Droople

Exclusively from AA First

Droople is an intelligent monitoring solution that connects your water dispensing equipment to the Cloud. This allows you to monitor a range of metrics in real time, giving you the ability to respond promptly to issues, save money on operational costs and get ahead of your competition.

How does it work?

Measure

Fitted discreetly to your water equipment, they are installed on water lines after the filter. Able to measure one of the below metrics, they provide real-time data without disruption.

Transfer

The data collected is wirelessly transmitted from the iLink devices. This is either directly to the Droople platform or via a separate gateway.

Analyse

All of your data is viewable in Droople's cloud platform. Access real-time dashboards, receive automated alerts and track performance metrics.

What can be measured?

Flow Rate

Temperature

Conductivity

CO₂ Pressure

Water Pressure

Quality – Reliability – Integrity

Our range of water filters and installation kits ensures pure, great-tasting water and reliable dispensing performance. Complementing our filters, our installation kits provide a complete, ready-to-fit solution with rails, valves and fittings. Together, they protect your equipment, enhance water quality, reduce maintenance costs and keep your customers refreshed with every glass.

Our three filtration tiers let you choose the level of protection that fits the needs of you and your customers. Our range covers everything from essential filtration to advanced protection for consistently crisp results. Whatever your choice, each tier ensures the perfect blend of purity, performance and reliability.

FILTERXL

Bronze filtration

One-way filter housing with a sealed carbon block candle. Designed to remove chlorine impurities from mains water. This reliable solution delivers an effective first stage of filtration, providing a solid foundation for any water dispenser setup.

FILTCARHOU

Gold filtration

Carbon block candle with reusable housing. Delivers the same high level of protection as our Bronze-tier Filter XL, with the added benefit of long term cost savings. The durable and reusable housing means that after installation, only the filter candle needs replacing, making maintenance more economical and environmentally friendly.

FILTCARHOUNANO

Platinum filtration

High-pharma rated Nanofilter candle with reusable housing. This set up removes 99.9% of bacteria, virus' and other contaminants. This is the ultimate filter set up that offers unbeatable protection and long-term savings for you and your customers. The reusable filter housing is both cost-effective and environmentally responsible, significantly reducing plastic waste with every replacement.
