

Overflow Kits

Overflow kits and mains drainage

We supply a selection of water cooler overflow kits and mains drainage systems. Designed for practicality and ease, our solutions will keep your customers environment clean, safe, and spill free. Our overflow kits are essentially waste storage containers that collect waste water caught in a machines drip tray. Built with key features including alarms, drainage taps, float cut-off switches and more. We also offer two mains drainage systems for the ultimate hassle free option. Automatically disposing of waste water by connecting to your customers mains waste drainage point.
